

Streamex Corp. Brings Yield-Bearing Gold (GLDY) to Traditional Brokerage Accounts Through Collaboration with Siebert Financial and tZERO

June 29, 2026

Highlights

- **GLDY can now be bought through a traditional brokerage account.** Siebert brokers will now offer GLDY to their clients the same way they would any stock or bond, no blockchain knowledge required. Investors simply work with their Siebert broker to add GLDY to their portfolio.
- **Siebert's ~\$20B retail wealth management along with its established institutional distribution network expands access to GLDY.** This collaboration gives Siebert's wealth management and institutional clients access to GLDY.
- **This partnership is the future of finance, happening today.** The industry has spent years talking about bridging traditional finance and blockchain. Streamex, Siebert, and tZERO are executing it: a FINRA-member broker selling a gold-backed, yield-bearing tokenized security, custodied on a regulated digital asset platform.

WINTER PARK, Fla., June 29, 2026 (GLOBE NEWSWIRE) -- **Streamex Corp. ("Streamex" or the "Company") (NASDAQ: STEX)**, a technology company building the future of the commodity markets through tokenization, today announced a collaboration with Siebert Financial Corp. ("Siebert") and tZERO Group, Inc. ("tZERO") to make GLDY, Streamex's gold-backed, yield-bearing tokenized security, available for purchase through Siebert's wealth management and institutional distribution channels.

This collaboration represents a defining moment in the convergence of traditional finance and blockchain-enabled markets. A FINRA-member broker-dealer is now selling a blockchain-native tokenized security to its clients through the same infrastructure it uses for every other investment. The asset will be custodied on a regulated digital securities platform.

Under this collaboration, Siebert brokers and institutional sales force will be able to offer GLDY to their existing wealth management and institutional clients as part of a standard investment conversation, no crypto onboarding, no technical complexity. Investors purchase GLDY through Siebert in the same manner they would purchase any other financial instrument. They can then hold their GLDY in custody at tZERO, providing them with a regulated, institutional-grade experience.

Henry McPhie, Co-Founder & Chief Executive Officer of Streamex, said:

"We are extremely excited to bring this collaboration online, fundamentally changing GLDY's distribution profile. By partnering with two best-in-class institutions in Siebert and tZERO, both of whom share our conviction that regulated tokenized securities are the next chapter of capital markets, GLDY can now reach investors through channels they already know and trust. A Siebert broker can offer GLDY to an existing client the same way they would offer any other investment. That kind of access is what drives adoption and grows AUM at scale."

John J Gebbia, Chief Executive Officer of Siebert Financial Corp., said:

"At Siebert, our role is to help investors access what's next in the markets through a trusted brokerage relationship. GLDY is an example of how traditional finance and blockchain-enabled infrastructure can work together without adding complexity for the investor. Clients can speak with their Siebert broker, evaluate whether GLDY fits their goals and risk profile, and, where appropriate, purchase it through a brokerage account."

Alan Konevsky, Chairman and Chief Executive Officer of tZERO, said:

"For years, the industry has talked about bringing tokenized real-world assets into the mainstream financial system. This collaboration shows what that looks like in practice. By combining Siebert's trusted brokerage relationships, Streamex's innovative gold-backed security, and tZERO's regulated digital securities infrastructure, we're making tokenized investing available through familiar channels while preserving the benefits of blockchain-based capital markets. This is another step toward a financial system where every asset can become investable."

What This Means for GLDY Investors

GLDY is a gold-backed, yield-bearing tokenized security that pays an up to 3.5% annualized yield in additional gold through gold leasing. With this collaboration, GLDY is now easily accessible through Siebert's distribution network, making it available to a significantly broader base of accredited and institutional investors. GLDY will be custodied at tZERO, a leading digital securities platform regulated under applicable federal securities laws.

Investors who do not currently have a Siebert brokerage account and are interested in learning more about purchasing GLDY may contact Siebert to begin the account opening process and speak with a licensed representative.

About Siebert Financial Corp.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding Streamex's business strategy, future growth, product development, distribution expansion, secondary market activity, revenue generation, and the expected performance and adoption of GLDY. These statements are based on current expectations and assumptions that are subject to risks and uncertainties, many of which are beyond Streamex's control, and actual results may differ materially. Factors that could cause such differences include, among others, market conditions, regulatory developments, the continued operation of third-party platforms including Siebert and tZERO, and macroeconomic factors affecting digital asset and commodity markets. A discussion of these and other factors is set forth in Streamex's filings with the Securities and Exchange Commission, including its most recent Annual Report on Form 10-K, as may be supplemented or updated by Streamex's Quarterly Reports on Form 10-Q and Current Reports on Form 8-K. Streamex undertakes no obligation to update or revise any forward-looking statements except as required by applicable law.
